TECH STACK MASTERED

**Precision Engineering**  
Writing clean, scalable, and maintainable code is my top priority.

**User-Centric Design**  
I believe technology should serve people, not the other way around.

**Agile Problem Solving**  
Adapting quickly to challenges and delivering efficient results.

# Executive Engineering Profile

SYSTEM LAYER 08 // ARCHITECT OVERVIEW

I help startups, businesses, and founders build scalable SaaS platforms, AI-powered applications, enterprise software, and modern web products.

With **3+ years of experience** as a Full Stack Software Engineer, I specialize in designing and developing production-ready applications using React, Next.js, Angular, TypeScript, Node.js, NestJS, PostgreSQL, MongoDB, and modern cloud technologies.

I have built CRM platforms, workflow automation systems, ATS resume builders, enterprise dashboards, AI-powered assistants, ERP modules, and multi-tenant SaaS applications with a strong focus on scalability, performance, security, and user experience.

## CORE EXPERTISE

- ✓ Full Stack Development (React, Next.js, Angular, Node.js, NestJS)
- ✓ SaaS Product Development & Multi-Tenant Architecture
- ✓ AI Applications, LLM Integrations & RAG Systems
- ✓ Enterprise Software & Business Platforms
- ✓ REST APIs, WebSockets & Backend Engineering
- ✓ PostgreSQL, MongoDB, Prisma & Database Design
- ✓ Workflow Automation & Business Process Solutions
- ✓ Performance Optimization & Scalable Architecture

## WHY WORK WITH ME?

- Clean, maintainable, and scalable code
- Strong system design and architecture skills
- Production-ready solutions built for long-term growth
- Clear communication and reliable delivery
- Experience working with startups, enterprise teams, and international clients

Whether you need an MVP, SaaS platform, AI-powered product, CRM system, internal business tool, or a complete full-stack application, I can help turn your idea into a secure, scalable, and production-ready solution.
