SUMMARY

Full Stack Software Engineer with 3+ years building production SaaS, enterprise ERP, and AI-powered applications on a TypeScript-first stack: React, Next.js, Angular, Node.js, NestJS, PostgreSQL, and MongoDB. Experienced in multi-tenant architecture, RBAC, real-time systems, and LLM/RAG engineering, owning features from system design through CI/CD deployment on AWS.

KEY ACHIEVEMENTS

- Accelerated data retrieval by **40%** on an enterprise ERP platform used across **75+ countries** through MongoDB index restructuring.
- Architected a **multi-tenant SaaS CRM** in NestJS, PostgreSQL, and Prisma with organization-scoped data isolation, custom role-based access control, Stripe subscription billing, and real-time WebSocket updates.
- Engineered **LLM-powered products**, including production RAG pipelines that ground responses in verified enterprise data through embeddings and vector search, and a real-time voice AI desktop assistant.

TECHNICAL SKILLS

Languages & Frontend: TypeScript, JavaScript (ES6+), React, Next.js, Angular, Redux, Zustand, TanStack Query, Tailwind CSS, Three.js, HTML5, CSS3

Backend & Databases: SQL, Node.js, NestJS, Express.js, REST APIs, WebSockets, Microservices, PostgreSQL, MongoDB, Redis, Prisma, Supabase, SQLite, Swagger/OpenAPI, Stripe

AI, Cloud & Architecture: OpenAI, Gemini, LLM Integration, RAG, Vector Databases, Embeddings, AI Automation, AWS, Docker, GitHub Actions, Vercel, Multi-Tenant SaaS, RBAC, JWT/OAuth, System Design, Real-Time Systems, Performance Optimization

Testing & Quality: Playwright, ESLint, Prettier

EXPERIENCE

- Software Engineer | TallyMarks Consulting (TMC) |** Lahore, Pakistan 11/2025 – Present
- Own front-end delivery for enterprise React and Next.js applications in TypeScript, covering component architecture, state management, and data fetching, and improving load and render performance via code splitting, memoization, and SSR.
 - Ship AI features on production RAG pipelines, chunking and embedding enterprise data into a vector database and serving retrieval and LLM inference behind typed APIs so responses stay grounded in verified company data.
- Associate Software Engineer | Strategist Hub |** Lahore, Pakistan 07/2025 – 11/2025
- Built an AI meditation desktop assistant in Electron and React for Aura Health's **8M+ users**, delivering real-time voice and text conversation over a low-latency streaming loop with integrated ElevenLabs voice AI and secure authentication.
 - Integrated the meditation and relaxation track library so users can request tracks from the AI by mood and play them in-app.
 - Implemented persistent chat history and per-user context across sessions; optimized the app via code splitting and lazy loading.
- Software Engineer | Terminus Technologies |** Lahore, Pakistan 05/2024 – 07/2025
- Developed an enterprise ERP platform with dashboards, analytics, and multi-role reporting supporting operations in 75+ countries.
 - Restructured MongoDB indexes and removed redundant queries on large collections behind real-time React and Redux dashboards.
 - Designed RESTful Node.js and Express.js APIs with scalable schemas, consistent error handling, and clear layer separation.
- Full Stack Software Engineer | Freelance (Contract) |** Remote 08/2023 – Present
- Own client SaaS, CRM, dashboard, and AI products from technical scoping through implementation and AWS deployment.
 - Integrated Stripe payments, real-time communication, cloud storage, file management, and email and analytics services.

SELECTED PROJECTS

- Enterprise CRM Platform (Multi-Tenant SaaS) |** Angular, NestJS, PostgreSQL, Prisma, WebSockets, Stripe 04/2026
- Architected a multi-tenant CRM enforcing organization-level data isolation, granular custom RBAC with permission guards, and JWT authentication on a modular NestJS and Prisma backend documented with Swagger/OpenAPI.
 - Implemented Stripe subscription billing with idempotent webhook processing, event-driven workflow automation, PDF and CSV reporting, and WebSocket gateways delivering real-time notifications to the Angular client.
- Resume Builder SaaS |** Next.js, TypeScript, Zustand, Tailwind CSS, Gemini LLM API 10/2025
- Built an AI-assisted resume optimization SaaS with PDF, DOCX, and TXT resume parsing, a real-time ATS scoring engine, LLM-powered rewriting of bullets and summaries, live preview, and server-side PDF export.
- 3D SaaS Portfolio |** React, Three.js, Express.js, SQLite, Tailwind CSS 11/2024
- Engineered a multi-tenant portfolio CMS with an interactive Three.js WebGL front end, a JWT-secured Express REST API, an admin control panel, and real-time theming, serving multiple portfolios from one deployment.

EDUCATION & CERTIFICATIONS

BS Software Engineering | Punjab University College of Information Technology (PUCIT), Lahore 10/2020 – 06/2024

Certifications: Full Stack Web Development (Udemy, 2024) | AI Engineer Certification (2025)

Languages: English (professional), Urdu (native)
