

Qurban Hanif

FULL STACK SOFTWARE ENGINEER

📍 Lahore, Pakistan | 📞 03085651015 | ✉ qurbanhanif120@gmail.com | 🌐 qurban015 | 📺 qurban7860 | 📁 Portfolio

SUMMARY

Full Stack Software Engineer with 3+ years of experience building scalable SaaS platforms, enterprise ERP systems, and AI-powered applications. Specializes in React, Next.js, Node.js, TypeScript, and PostgreSQL with hands-on experience in multi-tenant architectures, RBAC systems, real-time applications, and LLM-based workflows. Delivered production systems including CRM platforms, ERP dashboards, automation tools, and AI assistants used in enterprise and client environments. Strong focus on s performance, backend architecture, and building maintainable, scalable software systems.

KEY ACHIEVEMENTS

- Delivered enterprise software, SaaS, AI-powered applications, and client solutions across ERP, CRM, automation, analytics, and productivity domains.
- Built multi-tenant platforms featuring RBAC, workflow automation, real-time collaboration, payment integrations, audit logging and reporting systems.
- Implemented AI-powered solutions using LLMs, Retrieval-Augmented Generation (RAG), vector databases, and intelligent automation workflows.

SKILLS

Languages & Architecture: JavaScript, TypeScript, Python, SQL, System Design, Multi-Tenant Architecture, RBAC, Microservices Concepts

Frontend Development: React.js, Next.js (SSR/SSG), Angular, Redux, Zustand, TanStack Query, Zod, Axios, Material-UI, Tailwind CSS

Backend & Databases: Node.js, Nest.js, Express.js, REST APIs, PostgreSQL, MongoDB, Swagger, Redis, Prisma ORM, Supabase, WebSockets, Stripe

Cloud, AI & DevOps: AWS (EC2, S3), Docker, CI/CD (GitHub Actions), LLM Integration, RAG Pipelines, Vector Databases, AI Automation Workflows

EXPERIENCE

TallyMarks Consulting (TMC) | *Software Engineer* | *Lahore, Pakistan* **11/2025 – Present**

- Developed scalable enterprise applications using React, Next.js, TypeScript, and modern frontend architecture principles that optimized performance.
- Implemented AI-powered features and RAG-based workflows by integrating LLMs, vector databases, and enterprise data sources for retrieval.
- Collaborated with cross-functional teams to deliver production-ready solutions with focus on performance, maintainability, and user experience.

Strategist Hub | *Associate Software Engineer* | *Lahore, Pakistan* **07/2025 – 11/2025**

- Built an AI desktop assistant for meditation and mindfulness using Electron and React enabling real-time voice and text interaction with an AI agent.
- Integrated ElevenLabs voice AI, authentication and meditation content library, supporting secure login, chat history, and personalized user experience.
- Optimized rendering performance, code-splitting, and responsive layouts to ensure consistent experiences across desktop and mobile devices.

Terminus Technologies | *Software Engineer* | *Lahore, Pakistan* **05/2024 – 07/2025**

- Developed an ERP system with dashboards, analytics, and reporting features for a global engineering company operating in 75+ countries.
- Built real-time monitoring dashboards using React and Redux, improving data retrieval speeds by 40% via optimized MongoDB indexing.
- Designed and integrated RESTful APIs using Node.js and Express.js while maintaining scalable database structures and clean backend architecture.

Freelance Projects | *Full Stack Software Engineer* **08/2023 – Present**

- Delivered software solutions including SaaS platforms, enterprise dashboards, CRM systems, AI-powered applications, and custom business platforms.
- Integrated payment gateways, cloud services, email systems, analytics platforms, file management solutions, and real-time communication features.
- Ensured software quality through scalable architecture, performance optimization, security best practices, and maintainable code standards.

PROJECTS

Enterprise CRM Platform (Multi-Tenant SaaS) | *Angular, Nest.js, PostgreSQL, WebSockets, Stripe* **04/2026**

- Designed multi-tenant CRM supporting role-based access control, isolated tenant schemas, and real-time collaboration for distributed sales teams.
- Implemented modular backend architecture supporting CRM, subscriptions, custom workflows, and reporting modules to support business operations.

3D SaaS Portfolio | *Three.js, React, Express.js, SQLite, Tailwind CSS* **11/2024**

- Built a full-stack SaaS portfolio platform with CMS and admin panel, supporting real-time themes, media uploads and routing-based deployment.
- Designed a scalable architecture with optimized database structure, user-isolated portfolio configurations and interactive 3D UI experiences.

Resume Builder SaaS | *Next.js, TypeScript, Zustand, Tailwind CSS, AI/LLMs* **10/2025**

- Developed an ATS-optimized resume builder with AI-assisted content enhancement, resume parsing, scoring engine, live preview, and PDF export.
- Implemented a frontend architecture with state management, real-time validation, and export workflows for professional resume generation.

EDUCATION

Punjab University College of Information Technology (PUCIT), Lahore **10/2020 – 06/2024**

BS Software Engineering

Lahore, Pakistan

Coursework: Software Engineering, Web Engineering, Object-Oriented Programming (OOP), Data Structures & Algorithms (DSA), Database Management Systems (DBMS), Problem Solving, UI/UX Principles.

CERTIFICATIONS

- Full Stack Web Development (MERN) Bootcamp | Udemy (2024)
- JavaScript Algorithms and Data Structures | freeCodeCamp (2023)
- Meta Front-End Developer Certificate | Coursera (2023)
